TSP FRAMEWORK USER GUIDE

Understanding the TCF University Programme Grid

This guide will help you understand how to use the university grid created by TCF. It shows which university programme grid are supported under the **Tertiary Support Programme (TSP)**.

How the Grid is Organized

- The grid is divided by discipline (e.g., Engineering, Health Sciences).
- Each discipline has groups of similar degree programmes.
- All degree programs in the policy are grouped within the following seven disciplines:
 1. Engineering
 2. Management Sciences
 3. Computer Studies
 4. Health Sciences
 5. Social Sciences & Arts
 6. Natural Sciences
 7. Agricultural Sciences

Example:

- **Discipline:** Computer Studies
- **Groups:** Computer Science, Information Technology, Computer Engineering, and Software Engineering
- **Degree Programs within Computer Science Group:** BS Artificial Intelligence, BS Business Analytics, BS Data Analytics, or BS Computing & Data Science

It's important to note that universities may use different program names, but they will typically be variations of the same.

University Type (Sector)

Each university is marked as either:

- Public (Government-run)
- Private (Privately-run)

This classification helps you understand who manages the university. The TSP policy includes a total of 182 universities across both public and private sectors, where TCF may facilitate placements for its alumni in higher education.

TCF encourages admission to public universities. For private universities, while TCF may provide full tuition scholarship, students are also required to apply for the university's internal scholarship opportunities.

The final selection of the most suitable university for each student is made in consultation with the TCF Alumni Pathways Team, ensuring the best possible academic and financial fit.

How to Use This Grid

Step-by-step:

1. Find your **discipline** (e.g., Engineering, Health Sciences)
2. Look for your **group of programmes** under that discipline
3. Find the **programme** you are interested to apply in

Guidance for choosing a university:

We recommend that you,

- Start by researching universities in your own city using reliable sources (such as university websites, google, or official admission portals).
- Identify programmes that match your interests, academic background, and eligibility criteria.
- Shortlist your preferred options and discuss them with the Alumni Pathways Team for guidance and final direction.

Cases that are ineligible for TCF Support

- Secured admission in a university not listed in the TSP Policy
- Secured admission in an affiliated college

In these cases, it is encouraged to have a conversation with the Alumni Pathways team before making the final decision.

Discipline, Groups and Programmes Grid:

DISCIPLINES						
COMPUTER STUDIES	ENGINEERING	HEALTH SCIENCES	MANAGEMENT SCIENCES	NATURAL SCIENCES	SOCIAL SCIENCES & ARTS	AGRICULTURAL SCIENCES
Groups & Programmes	Groups & Programmes	Groups & Programmes	Groups & Programmes	Groups & Programmes	Groups & Programmes	Groups & Programmes
Computer Science (Artificial Intelligence, Business Analytics & Programming, Business Data Analytics, Computing & Data Sciences) Computer Engineering Information Technology (Cyber Security, Information Management, Information Security) Software Engineering	Aerospace & Aeronautical Engineering (Aircraft Maintenance & Technology, Aviation Management, Avionics Engineering) Chemical & Petrochemical Engineering (Petroleum & Gas Engineering) Civil & Environmental Engineering (Energy Systems Engineering, Geological Engineering, Water Resource Management) Electrical & Electronics Engineering (Telecommunication Engineering) Industrial and Manufacturing Engineering Materials, Mining & Textile Engineering (Garment Engineering, Materials Engineering, Metallurgy and Materials Engineering, Mining Engineering, Polymer Engineering, Textile Engineering) Mechanical Engineering (Mechatronics and Control Engineering) Marine Engineering (Naval Architecture)	Medicine MBBS (Bachelor of Medicine, Bachelor of Surgery) Dentistry BDS (Bachelor of Dental Surgery) Nursing BS Nursing (Bachelor of Science in Nursing) Clinical & Medical (Anesthesia, Cardiology, Dental Hygiene, Orthotics & Prosthetics, Speech and Language Pathology, Doctor of Veterinary Medicine) Allied Health (Physiotherapy, Emergency and Intensive Care Sciences, Occupational Therapy, Operation Theater Sciences, Operation Theater Technology, Respiratory Therapy and Critical Care Sciences, Dialysis and Critical Care Sciences) Pharmaceutical & Nutritional Sciences (Eastern Medicine, Food Engineering, Food Nutrition & Dietetics, Food Science & Human Nutrition, Food Sciences & Technology, Nutritional Sciences, Pharmacy) Vision Care, Diagnostic & Technical (Clinical Laboratory Sciences, Medical Lab Technology, Medical Technology, Medical Ultrasound Technology, Optometry, Radiological Imaging, Radiology Technology, Nuclear Medicine and Radiotherapy) Biotechnology & Biomedical Engineering (Medical Engineering)	Business Administration & Management (Business Information Systems, Commerce, Digital Marketing, Management and Technology, Management Sciences, Project Management, Supply Chain Management, Healthcare Management, Entrepreneurship) Finance & Economics (Accounting, Accounting & Finance, Actuarial Science and Risk Management, Accountancy Management & Law, Banking & Finance, Economics & Mathematics, Economics with Data Science, Islamic Banking and Finance, Islamic Economy and Banking) Tourism & Hospitality Chartered Accountancy (CA)	Biological Sciences (Bio Informatics, Biological Sciences, Biology, Botany, Genetics, Microbiology, Molecular Biology, Zoology) Chemistry, Physics & Marine Science (Biochemistry, Forensic Chemistry) Statistics & Mathematics (Applied Mathematics)	Architecture Art & Design (Ceramic & Glass Design, Computer Arts Design, Fine Arts, Furniture Design & Manufacture, Interior Design, Jewellery Design & Gemological Sciences, Leather Accessories & Footwear, Product Design) Education (Education & Research, Special Education) Fashion & Textile (Fashion & Accessories Design, Fashion Design, Fashion Marketing & Merchandising, Textile Management and Marketing) Health & Physical Education Islamic & Comparative Religions Studies (Islamic Studies, Comparative Religions, Comparative Studies, Comparative Literary) Language & Literature (Applied Linguistics, English, English Literature, Language, Linguistics, Pashto, Sindhi, Urdu, Urdu Literature, Arabic) Law & Criminal Studies (Criminology) Media Sciences & Communication (Communication and Design, Film & Television, Graphic Design, Journalism & Mass Communication, Music, Visual Communication Design) Political & Social Sciences (Anthropology, Behavioural Science, Cultural Studies, Defense & Strategic Studies, Disaster Management, Environmental Sciences, Environmental Management and Policy, Gender Studies, Geography, Geology, History, International Relations, International Studies, Library & Information Science, Pakistan Studies, Philosophy, Politics & Economics, Psychology, Public Administration, Public Policy, Public Health, Social Development & Policy, Sociology)	Agricultural Sciences (Agriculture Engineering, Animal Sciences, Dairy Technology, Entomology, Fisheries & Aquaculture, Forestry, Poultry Science, Wildlife)
